Technical Skills

Programming Languages: JavaScript, TypeScript, Swift, Kotlin, Dart, Go, Java

Frontend & Tools: Flutter, Jetpack Compose, SwiftUI, Riverpod, View Model, Git, GitHub, Drift, Dio

Backend : Node.js, Express.js, MongoDB, JWT, REST APIs, Microservices, GRPC, MySQL, Postgres, Cassandra, S3, Openfga, Materialize, Temporal, Actix, Prisma, Drizzle

DevOps : Kafka, Redis, Nats, Docker, Kubernetes, Jenkins, AWS, Nginx, Ansible, Traefik

Testing & Quality Assurance: Testcontainers, Vitest

Education

Vidya Vihar Institute Of Technology

2022 – 2025

Bachelor of Computer Applications

CGPA 7.7/10

Experience

ShapTech

Feb 2025 – April 2026

E-Commerce Platform – Mobile Application

Remote

- Developed a modern e-commerce mobile application using **SwiftUI** for iOS and **Jetpack Compose** for Android, delivering responsive and user-friendly experiences.
- Built product listing, product detail, shopping cart, and checkout screens with smooth navigation flows.
- Integrated REST APIs for product catalog, cart management, and secure payment workflows.
- Implemented state management for real-time cart updates and seamless user experience.

Coin-Based Transaction System – Mobile Application

- Developed a scalable Flutter-based digital wallet application enabling coin-based transactions across hospitality properties.
- Engineered intuitive user experiences for wallet management, transaction history, and secure payment workflows.
- Integrated **gRPC-based microservices** using Protocol Buffers to support low-latency transaction processing and real-time wallet synchronization.
- Implemented robust state management and optimized data flow, ensuring responsive UI updates across transaction-intensive screens.

Equality Through Education – NGO Mobile Application

- Developed a mobile platform providing centralized access to educational resources.
- Implemented administrative dashboard to manage and distribute PDF content efficiently.
- Increased student resource accessibility.

Projects

Discord Clone Android App | *Kotlin, Jetpack Compose, gRPC, LiveKit, Hilt, Room*

May 2025

- Built a Discord-inspired Android application with real-time messaging, voice/video calls, and guild/channel management using Kotlin and Jetpack Compose.
- Implemented **bidirectional gRPC streaming** with Protocol Buffers for real-time chat, presence tracking, and state synchronization.
- Integrated **LiveKit WebRTC** SDK for low-latency voice/video communication and screen sharing capabilities.
- Utilized **Hilt** for dependency injection, Room for local caching, and EncryptedSharedPreferences for secure token management.
- Followed **MVVM + Clean Architecture** across 15+ screens, ensuring scalable and maintainable code organization.

ChatConnect | *Swift, SwiftUI, Firebase, Firestore, Authentication*

2026

- Developed a real-time chat application using **SwiftUI** and Firebase, enabling seamless one-to-one messaging and user interactions.
- Implemented **Firebase Authentication** for secure user registration, login, and session management.
- Integrated **Cloud Firestore** for real-time message synchronization and scalable chat data storage.
- Designed efficient data models for users, conversations, and message history to support responsive chat experiences.
